

PLEASE do not change your policies in regard to major FM radio.

I am particularly concerned about the push to allow these "low frequency" FM local channels to be able to usurp current air or space being given to nationwide broadcasts like the KLOVE Christian Radio station.

I don't pretend to understand how radio transmitters work, but I DO know the impact KLOVE radio station has on my life AND on my children.

Why would you, the FCC, want to stop a broadcast that touches so many thousands or millions of people?

I don't know all the technical words, so perhaps I am using the wrong terminology, but as a consumer, I am requesting that you do NOT change current policy.

Do NOT allow these "low frequency" FM channels to bump whatever it is that allows KLOVE Christian Radio all over this country.

When I am having a "down" day, KLOVE is there.

When I am feeling upbeat, KLOVE is there.

When I want to listen to an encouraging word, KLOVE is there.

Please do not change that. KLOVE radio is needed in MY life. Doesn't my voice count?

Thank you for your time and consideration.

Susan Brickett
